MMP174 – MIGOTHER File

Description

MIGOTHER is a cross-sectional file for another person within the household that migrated to the U.S. This information is only collected in households where the head of household was not a U.S. migrant.

MIGOTHER Variables

MMP174 – MIGOTHER file contains 1,014 observations and 244 variables. MIGOTHER started in 2007 with community 120; it is a person-level file containing details of all undocumented border crossings (up to 10), as well as measures of economic and social activity during the last U.S. trip.

Once the PERS file is constructed, in households where the head of household was not a migrant, we select another person within the household who reported at least one trip to the U.S. From PERS, we bring to MIGOTHER the person's background information from table A and U.S. migration information from tables D and D2, and then merge all the following variables:

- Undocumented border crossings (table K).
- Social, employment, and financial characteristics during the last U.S. trip (tables L and M).
- Benefits and assistance received during the last U.S. trip (table N).
- Work conditions as a temporary worker – if applicable (tables R and S)

Do not forget to download the Ethnosurvey from our page in order to obtain specific tables and questions.

First US Visit: Social and Financial Characteristics
Note: Questions for RELTRIP, PAISTRIP, LODGING, and FINHELP were originally aimed to measure characteristics on last U.S. trip. However, in 2000, they were changed to measure characteristics on first U.S. trip but kept the same name. In order to avoid further confusion, in 2011, we separated these variables by first and last trip. For all those migrants with one trip, the variables for first and last U.S. visit will have the same value. In 2012, we included both set of questions on our ethnosurvey.
